Exhibit B Remarks

This application is being filed to be used in conjunction with other applications to change filed simultaneously herewith from Kobeh and Diamond Valleys and those previously filed under Applications 85575, 85577, 85579, 85581, 85582, 85584, 85585, 85586, 85589, 85591, 85592, 85593, 85594, 85596, 85597, 85598, 85599, and 85603 in Kobeh Valley. The total combined duty of all the change applications will not exceed the consumptive use of 11,678.18 acre feet.

The points of diversion are fully set forth in the Hydrogeology and Numerical Flow Modeling Report dated April, 2010, prepared by Eureka Moly, and submitted to the Bureau of Land Management.

Groundwater will be developed from the Kobeh Valley Groundwater Basin, through a series of production wells. Water will be conveyed to a storage reservoir via a booster pumping station. Water from the storage reservoir will be conveyed to the reduction plant or mill, located within the Diamond Valley drainage basin. After the water is placed to a beneficial use within the reduction plant, a portion of the water will be diverted to a recycling pond, with such water returned to the storage reservoir. The vast majority of water will be carried via the tailings leaving the reduction plant, and will be placed in a tailings pond, located within Kobeh Valley.

Thus, the majority of water consumption will take place in Kobeh Valley, and not Diamond Valley.

The total volume of water to be consumed, being the total combined duty of all applications filed herewith shall not exceed 11,678.18 acre-feet annually. The contemplated mine life, as currently best determined, is 44 years, commencing upon start up or commencement of the mine and works of reduction.

RECEIVED APR 27 2016

STATE ENGINEER'S OFFICE

Exhibit C Miscellaneous Remarks

Kobeh Valley Ranch, LLC ("KVR") believes that the correct course of action following the Nevada Supreme Court's September 18, 2015 Order on the appeal from State Engineer Ruling 6127 is for the District Court to remand the case to the State Engineer and for the State Engineer to conduct further hearings on the applications at issue in Ruling 6127. However, the Applications approved in Ruling 6127 are currently denied, which decision is under appeal.

The four change applications changing Permits 78272 through 78275 are being filed to replace the new appropriation for mining use that were approved in Ruling 6127. If the new appropriations under Ruling 6127 are later reinstated, the four change applications may be withdrawn to the base right, or changed by a new change application, to return the water to irrigation use as permitted under Permits 78272 through 78275.

The total combined duty of the four change applications changing Permits 78272 through 78275 is not to exceed 6,337.32 acre feet with a consumptive duty not to exceed 4,277.691 acre feet.
